

Objective Technology of Norway - HPC-09 v6

A proven system to optimise energy savings, strength predictability and productivity in the production of precast concrete slabs.

Plan, control, monitor and document your precast production with our **HPC-09 v6** system – take the guesswork out of your business, our technology is based on a sound combination of experience, science and mathematics.

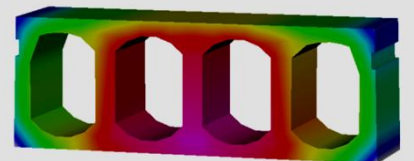

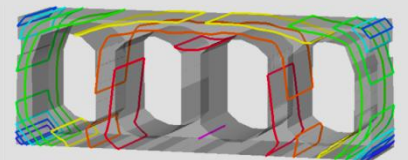

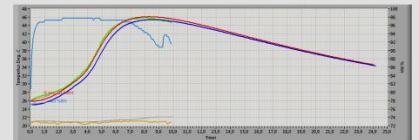

HPC-09 v6 is a complete, fully supported wireless system of hardware and software that captures key data from your production and revolutionises your understanding and control. Using our customised service you are in control of your concrete, its curing cycle and its properties for the first time.

Send us your contact information, and we will send you our **HPC-09 v6** White Paper!

21 good reasons to choose Objective **HPC-09 v6**:

1. Rapid payback on initial investment
2. Saves up to 75% of your energy bill – stop wasting energy
3. Reduces CO2 – a win-win for your customers
4. Increases plant productivity and capacity
5. Improves quality and consistency
6. Early warning of concrete mix problems reduces scrap rate
7. Programme analyses effect of key variables of bed-heating, forecasted and measured air-temperature in the plant
8. Provides confidence in attained concrete strength in 3D pictures
9. Predictable curing provided for the first time +/- 1.5 MPa (typical)
10. Switches your bed heating on and off when its provably needed
11. Aids the timing of product removal from the production bed
12. Fully traceable individual unit data can be provided with the delivery documentation
13. Avoid cracking with 3D temperature gradient plots to locate and prevent problems
14. Handles full range of concrete mixes
15. Calibration technology - automatic and quick within 30 minutes
16. Compliance with lean manufacturing principles
17. Documentation provided to your customer giving complete confidence
18. Affordable leasing and service support package
19. Proven technology in hollowcore production, can be used for other precast products
20. Technology developed by an engineer experienced in the fields of electronics, mathematics and programming
21. Base your business on facts not guesswork

Be Objective – Go Objective with **HPC-09 v6**
